Radiocube

Audio, DJ and RadioAutomation Suite

RADIOCUBE - THE ALL-IN-ONE SOLUTION IN PERFECT QUALITY

FOR EACH PURPOSE THE RIGHT AUDIO SOFTWARE

Perfect Radio ONAIR workplace: Radiocube ONAIR XS & Radiocube Cart Machine XS.

We develop and distribute ambitious audio software for Radio Stations, DJs, Bars, Restaurants, Shops and home users (HiFi). All products are based on professional radio automation software applications. Our primary focus for our products lies on clarity, great functionality, simple handling and extreme reliability. We, being software developers as well as radio station operators, know what our customers want and what they need – superior and extremely reliable software.

WITH THE DIFFERENT VERSIONS OF RADIOCUBE, YOU ARE BEST PREPARED FOR EACH USE.

Its scopes of use are as manifold as Radiocube itself. That is why Radiocube is used and appreciated likewise by professionals and audio enthusiasts. Whether you want to use Radiocube as a luxurious HiFi home application for your multimedia PC which can fully develop its efficiency in combination with a MP3 player, or

as an integrated DJ tool with an efficient DJ mixer or as a music player for bars, clubs, hotels, restaurants and shops or as a highly professional radio system for live assisted and fully automated program playout system, Radiocube with its huge product diversity is the perfect tool for your audio application!

Under www.radiocube.com you will find additional informations like feature lists and free of charge demo versions to download of each Radiocube product.

Powerfull DJ mixer in Radiocube DJ.

Various available keyboards for easy and fast operation.

Radiocube Home I & Home II

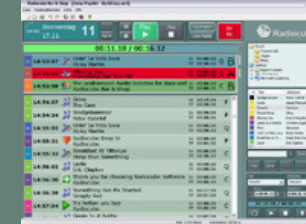

The ideal multimedia and playout system in two versions for the demanding home user, parties and Internet radio stations. It plays soundfiles in various formats with crossfades and individual set fade point and distinguishes itself with an elegant graphical user interface.

Radiocube ONAIR & Radiocube ONAIR XS

The most powerful, yet most affordable live assist and radio automation software available on the Internet. In two versions available for all demands, formats and sizes of radio stations.

Radiocube Bar & Shop

In your shop or in your bar you can let your customers hear what you want. Whether it is a perfect non-stop music mix or a hint at your premium offers or at your happy hour drinks at the right moment.

Radiocube Cart Machine & Radiocube Cart Machine XS

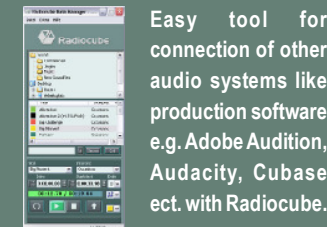

The audio playback system (up to 16 cartridge player), so simple to handle, is available in two versions: with mix function and logically arranged display for radio and TV production.

Radiocube DJ

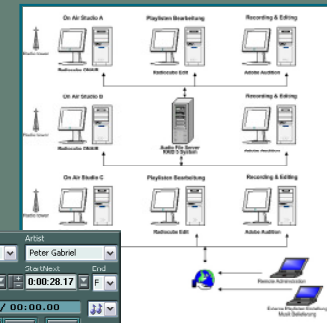

Thousands of songs are available. All important functions like a powerful DJ mixer with pitch control or jingle- and effect player are integrated. Play lists can be played manually or fully automated. Perfect suited for DJing with a notebook or for radio training purposes.

Radiocube Data Manager

Easy tool for connection of other audio systems like production software e.g. Adobe Audition, Audacity, Cubase ect. with Radiocube.

Radiocube is fully network capable. Professional prelisten player over separate audio output channel.

Radiocube supports audio processor, compressor / limiter, EQ, phaser, reverb, flanger, chorus and other DirectX effect plug-ins of 3rd party manufacturers.
