

## Radiocube major update version 2.5 has been released!

Please pay attention:

### General

- **New product:** Radiocube Home I for Home Entertainment with crossfade toolbar. Play list is limited to 100 elements. This is the entry version into Radiocube Audio Software.
- **New product:** Radiocube Data Manager to create XML meta data for intergration of audio production systems like: Audition / CoolEdit, Cubebase, ProTools, Wavelab or the freeware software Audacity.

### New features

- Build in crossfade toolbar for setting of overlapps and fade outs.
- Function to switch off crossfades by toolbar for titles with individual set crossfade point (StartNext).
- Function to switch off the crossfade for specific titles.
- Improvement of the fade characteristic in all versions from Home II. Additionally to linear fades setable fades: s-curve, exponential and parabel fades.
- Load and save of M3U, WPL, PLS play lists and support of Windows Media Player, Winamp and other MP3 audio player.
- ID3v1 meta tags read and write (title / artist / albumname / comment / year / track / genre) into MP3 files to display this meta data by use of MP3 players.
- Integration of a play list print function with the possibility to select items for print out. Available in all Radiocube versions including Radiocube Edit and Edit XS.
- Display of company / station name in the application caption, play list names and in log files.
- Log file „open“ dialog also availbale in Radiocube Cart Machine XS.
- Consideration of day light saving (summer/winter time) in association reports (GEMA/GVL).
- Automatic delete of log files. Delete after xx days setable.
- Function to load the last opened play list automatically by start of the application (in ONAIR products this function is disabled as default).
- Possibility to save last folder settings for play lists and file explorer (in ONAIR products this function is disabled as default).
- Show and hide the Crossfade Toolbar and Cartwall player (setable in the settings dialog, in Radiocube ONAIR XS controlled by user rights / administration).
- New user rights in the user administration of Radiocube ONAIR XS.
- Radiocube DJ, saves the last state of the Cartwall and Mixer if viewable or not.
- Radiocube DJ version: reverse the pitch fader direction.
- Radiocube File Explorer with exeption of Cart Machine XS in all versions possible to enlarge.
- Min. / max. values of all parameters for times, levels and pitch settings.
- Function to jump to current position in the play list by click on the ON AIR display.
